DETAILED ACTION / NOTICE OF ALLOWABILITY

Remarks

Acknowledgement is made of applicant's response of 10/3/2003, which has been received and placed in the file of record.

The examiner concedes the applicant's point that Nelson et al. (US 6,377,218) which was applied in the previous rejection, the system of dual data interfaces is used for **outward** communication with external sources and not for communication with the memory mass storage. These reasons are discussed further in the *Reasons for Allowance* section, below.

REASONS FOR ALLOWANCE

Claims 1, 3 and 4 are allowed. The following is an examiner's statement of reasons for allowance:

The examiner acknowledges that since Nelson (US 6,377,218) is a device for interfacing externally (i.e. it is an adapter). Even if it were also a memory card, the portion of the device that interfaces between a portable computer and the card is not wireless, so one would not expect wireless interfacing between a memory card and a laptop.

Further, even though memory cards are known which have one of two means of communicating with a device, i.e. either wired or wireless, the prior art fails to teach memory cards that have both means in the same card. Also, the applicant claims a controller that can select either the wired or wireless means.

One would not have been motivated to create the claimed configuration such that one interface is simply used to make the other one redundant (i.e. to handle failure of a first system) because the claimed system selects between two fully functional interfaces that behave differently.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
